Amid COVID-19 (coronavirus disease 2019) concerns, we want to assure our donors that this is a safe and clean place to donate blood. TBC has taken preventative measures to make sure our staff and donors remain healthy while they are here.

Are you feeling healthy & well today?
Is your temperature normal?

If you answered no to either question above, please come back when you are healthy.

Have you washed your hands recently?

Thank you for stepping up and being a hometown hero during this time. You are vital to your community blood supply!
Donate with Confidence
Thank you for showing up for your community today

About COVID-19
(coronavirus disease 2019)

What is COVID-19?
Coronavirus disease 2019 (COVID-19) is a respiratory illness that was first identified during an investigation into an outbreak in Wuhan, China.

How does COVID-19 impact blood donations?
Simply, it doesn’t. According to the U.S. Food and Drug Administration (FDA), there have been no reported or suspected cases of transfusion-transmitted COVID-19. Individuals are not at risk of contracting COVID-19 through the blood donation process or via a blood transfusion, since respiratory viruses are generally not known to be transmitted by donation or transfusion.

Routine blood donor screening measures are already in place to prevent individuals with clinical respiratory infections from donating blood. If the outbreak continues to spread, additional challenges could arise, which could potentially reduce the number of eligible donors. All healthy individuals are needed to donate. With the safety measures in place, know that you can donate blood with confidence at The Blood Connection.

If you are not feeling well or have a fever please come back when you are healthy.

What are the symptoms?
1. cough
2. shortness of breath
3. fever

How does it spread?
1. through the air
2. through touching infected surface then your own face
